## Day one - 19 May 2008 - Workshops

Starting at 9:00

Leveraging the BioBook Results Database to Build Cross-Experimental Queries and Reports

*Paul Denny-Gouldson & Scott Weiss, IDBS*

Demo and test drive the newest version of the E-WorkBook Suite

*we will show you some of the new features but why not bring your templates and see how they could be enhanced or just come and try what's new?*

What would you like to see?

*round table discussions to go through your ideas and suggestions for the product suite*

Road map discussions

*get information on our current thoughts on the vision for the E-WorkBook Suite*

User demos

*would you like to show off your template(s) and how you have used E-WorkBook Suite in your day to day work? Why not give a 10 min presentation to the group?*

---

Starting at 9:00 and 11:00

ActivityBaseXE Template Building Masterclass

*Jeff Tishler, IDBS*

*Experience the complete XE template building process, for Single Point and Dose Response assays, to see how result templates can be built quickly and effectively with ActivityBase XE.*

*Along the way you will be shown tips and tricks to enhance the usability of the templates for the XE Runner user, methods of extending XE to add custom features, some useful techniques for data analysis in XE Runner along with methods you can use to reduce the time you spend creating templates.*

*All details correct at time of press and may change without notice*

---
