

Making your Data Work Harder

IDBS E-WorkBook ELN

An ELN for the journey

When selecting the right Electronic Laboratory Notebook (ELN) for your organization, it's important to think not just about where you are now, but also where you want to be in the future. You need a flexible product that meets the needs of the different business units in your organization today, and that can rapidly respond to where you'll be tomorrow.

With the E-WorkBook ELN, you can scale performance as the number of users and quantity of your data grows. It delivers rapid return on investment with a generic deployment across business units and can tackle more complex challenges in subsequent phases.

Getting started with E-WorkBook ELN is simple. Installation is straight forward, and IDBS is here to advise and take the guesswork out of configuration to get your system up and running quickly. The E-WorkBook ELN's intuitive interface with drag-and-drop is easy to learn. We offer a variety of training options including Computer Based Training to get users on the system and generating value in no time.

Putting data at your finger tips

A quality ELN can transform your business. It's not about replacing paper notebooks with an identical electronic system. It's about doing things differently with a central focal point for managing content. Users can work and collaborate in a single shared environment, unlocking the value of your business data to increase productivity, reduce waste and shorten the time it takes to complete assays and take decisions. The result is the acceleration of the process of bringing products to market.

“E-WorkBook is a practical and adaptable choice of ELN that easily integrates with our workflow.”

Leading Pharmaceutical Company

Details matter

Most ELNs can capture unstructured data such as text, documents, and images. Some also support simple text-based searching. Unlike other products, the E-WorkBook ELN transforms this static content into a powerful, searchable repository of company knowledge and know-how. It marries flexible central dictionary management of master data terminology and codes with flexible metadata capture and powerful searching tools. This unique combination unlocks the potential of your company’s intellectual property by ensuring the context, as well as the content, is captured.

A platform for collaboration

Collaboration means connecting people with people and their data. The E-WorkBook ELN encourages people to work together and communicate. You can create tasks, send email alerts, and share project updates. You’re able to freely tag records with keywords or create comment threads to discuss findings. You can also follow your colleagues, topics of interest or active projects with personalized activity feeds, and generate reports or design dashboards.

Key Features – E-WorkBook ELN

- Capture text, images, sketches, PDFs, Microsoft Office and third-party documents
- Easy to use drag-and-drop functionality
- Ability to print and send content to the notebook from third-party software
- Integrated data dictionary for centralized terminology management
- Templates to standardize data capture
- Configurable review and signature workflows
- Comment threads to foster discussion and capture feedback
- User generated tagging for record markup
- Integrated searching of all metadata, annotations, document text, comments and tags
- Configurable activity feeds to follow teams, projects, people or tags of interest
- Generate and digitally sign PDFs that include all record content, full attachments, audit logs and all previous versions
