Looking ahead to 2017 – the year of the Cloud

Welcome to the final edition of our Insight newsletter for 2016. It’s been quite a year…

We’ve seen some outstanding sporting achievements in the Rio Olympics, Leonardo DiCaprio finally winning his Oscar, and political earthquakes on both sides of the Atlantic – the reverberations of which are certain to be felt in the R&D sector, not to mention around the world, in the months and years ahead.

Although we can’t predict everything at IDBS (you’ll have to look elsewhere for your political, entertainment and sporting tips, sorry!), we know that 2017 is going to be a big year for R&D. Here’s why.

External collaboration: what technology should you be using?
External collaborations are on the rise.
Working in R&D, you’ll already be familiar with the use of contract research organizations (CROs), joint ventures, academic partnerships and consortiums. In fact, you probably work with some of these groups already – and if you currently don’t, you certainly will in future.
